EXPERIENCE

Software Developer

August - Present

1000 Miles Limited

Developed and maintained corporate websites to expand company web presence and functionality. Streamlined internal operations and optimized manual processes by designing and deploying custom automated workflows using n8n and Make. Managed software-based employee onboarding and delivered continuous technical support for internal digital applications and software tools.

Full Stack Intern

Mar - June 2026

Lifewood Data Technology

Developed web-based projects and interactive applications, including a company showcase website and game project to demonstrate development capabilities. Gained experience with AI tools, assisted with SEO strategies and content enhancements.

UI/UX & Frontend Design Intern

Jan - Mar 2026

Camtastic Corporation

Assisted in UI/UX design by creating wireframes, website layouts, and application graphics. Developed responsive frontend interfaces using HTML and CSS while ensuring a consistent and user-friendly experience.
